### **DETAILED ACTION**

*Because of applicant's amendments to the claims, the claim objections of the prior office action have been withdrawn.*

*The 102 and 103 rejections of the prior office action have not changed.*

### ***Response to Arguments***

1. Applicant's arguments filed 7-9-2004 have been fully considered but they are not persuasive because of the following reasons:
  - Applicant's argument that the filter (90, 91, and 92) of Shibana do not surround his core 70 is unconvincing. Firstly, it is pointed out that the "surrounding" relationship is clearly shown in figure 4. Second, the prior action indicated that the surrounding filters also include the granular carbon media adjacent the filters 90, 91 and 92. Applicant's claims include no limitations requiring the filter media to extend from, between and in contact with both the top and bottom end caps in an axial direction with the core.
  - Applicant's arguments concerning the combination of references in the 103 rejection is unconvincing since the claimed surrounding relationship is taught by Shibana and since the modification of Carlson to include a pleated configuration would increase the surface area available for filtration of the gas.

### ***Conclusion***

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1723

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
